

Indicator Unit (new generation)

Display 21 and 24 compartments
modules 3 or 4 compartments
plug-in

Column 6 compartments

Compact; light illuminated message and fault displays.

Function: inform operators of status

- > Little space required on front
- > Uniform and contrast lighting
- > 6, 21, 24 compartment versions
- > Secured functioning
- > Cover and screen printing easy and quick change

Mechanical characteristics:

- Operating temperature: -25°C to +70°C
- Indicators can be read at an angle of 65°
- Important contrast (smoke version)
- No lighting interferences between compartments
- Weight: displays 24 comp. 750g, display 21 comp. 500g, Column 6 compartments 100g
- Protection:
 - Display 21 and 24 compartments : IK06, IP54 in front part, IP30 on back
 - Column 6 compartments: IK06, IP54 in front part
- Service life: 30 000 hrs

Standards:

- Shock and vibration: EN 61 373
- EMC: EN50 155

Electrical characteristics:

- Supply voltage: 72V
- Consumption: 0.72W per compartment at Un 72V
- Security:
 - Double LED circuit per compartment
 - Test lamp circuit
 - Non polarized
- Connection by connector
